Subject: Dimock Residential Groundwater Site - Request for START

John/Karen,

I am requesting that Weston START be issued a TDD to provide technical services support to EPA on the Dimock Residential Groundwater Site. Attached are the TAR and IGCE documents. Due to Weston's involvement with gas company clients in this area, I anticipate that the routine conflict of interest determination may or may not raise issues regarding the issuance of this TDD. However, it is my technical preference to use Weston, if mitigation of any conflict can be provided. I am available to discuss this, should you need any additional information.

This is a high priority site and the decision on this TDD should be attended to as soon as possible.

Thanks for your help.

Rich
